RE: Manuscript No. Sensors-86249-2025, Analysis and Experimental Validation of SSTDR for Simultaneous Distributed Diagnosis of Wire Networks

Dear Furse:

Thank you for submitting the above referenced manuscript to the IEEE Sensors Journal for possible publication.

We will do everything possible to expedite the processing of all manuscripts and to find the most suitable and qualified reviewers.

The tracking number assigned to your manuscript appears above; all correspondence or other inquiries regarding this manuscript should have the tracking number in the subject line.

The IEEE Sensors Journal has dedicated itself to providing the best possible publication opportunity. To that end, all individuals connected with the review and publication process have been requested to do their utmost to maintain the quality of the journal. We appreciate you selecting the IEEE Sensors Journal.

We want to take this opportunity to let you know about a new service available to our authors. If your paper is accepted, your color figures will be displayed in color on the web version posted on IEEE Xplore at no cost to you.

Please see an important message about voluntary page charges at the end of this letter.

While your manuscript is undergoing review, you may also submit it in its current form to TechRxiv, IEEE's preprint server. By uploading your manuscript to TechRxiv you can quickly disseminate your work to a wide audience and gain community feedback. Any comments you receive on the TechRxiv submission have no bearing on the peer review process. Submit your manuscript at <https://www.techrxiv.org/>.

Sincerely,

Shivani Chauhan
IEEE Sensors Journal Publications Office

IEEE SENSORS JOURNAL PAGE CHARGES

Although pages charges are voluntary, all authors are urged to agree to pay them. Acceptance or refusal of the charges has no bearing on the review of the paper. The revenues from the charges help to keep the cost of producing and mailing the journal to subscribers reasonable.

These charges also enable the IEEE to pass on the savings to its member subscribers in the form of unusually low subscription fees. Note that most funding agencies recognize that expenses associated with the publication and dissemination of research results are legitimate research costs that can reasonably be included in overall research budgets.

The \$110 per page charge for IEEE Sensors Journal is OPTIONAL for papers shorter than 8 pages.

The overlength charges of \$175 per page apply to papers longer than 8 pages and MUST be paid.
